Key comments

Net operating income drivers:

- Sales decrease driven by lower volumes partially offset by the growth in Digital services
- Positive performance on products cost reduction partially offset by product mix
- Decrease in Service costs led by cost efficiencies and lower sales volumes
- Decrease in Personnel costs driven by temporary unemployment program in different countries
- Increase in D&A driven by last year investments for new products lines and IT project (including digital transformation)
- Increase in provision for risk and charges is mainly due to the increase of bad debt provision
- Tax variation is due to lower profit before tax and devaluations of participations not deductible

Positive FX impact driven primarily by USD and JPY:

- +0.8m€ on revenues
- +0.7m€ on Net operating income
- +0.7m€ on Net result

TWC slightly increased but still on a normalization path
